

PRODUCT FEATURES:

- Mounts under the OEM third brake light for an OEM look.
- Adjustable swivel head camera for optimal view of your truck bed.
- HD CMOS camera for clear vision day and night.
- Terminates to a video RCA for universal application.

PARTS INCLUDED:

Third brake light mount cargo camera

20" extension cable

INSTALLATION INSTRUCTIONS:

1. Remove third brake light lens assembly.

2. Remove the dome light assembly.

3. Fish the CDR-03C camera cable under the headliner and towards inside the cabin.

4. Pull the camera cable and connect to the 4-pin barrel connector of the extension cable.

5. Run the cable along the headliner. Use a plastic pry tool to tuck it in neatly.

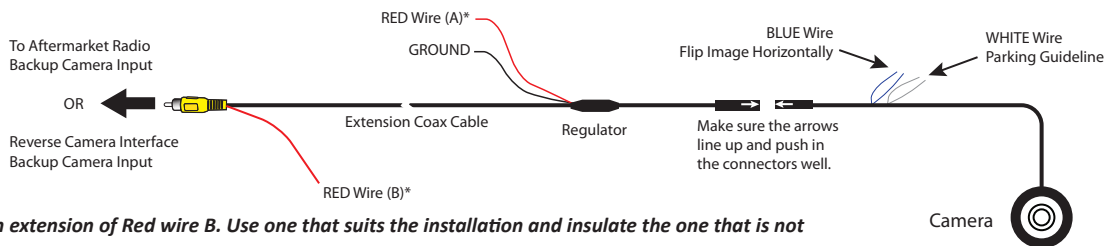

6. Continue running the cable along the C pillar, under the door sill, towards the radio.

7. Hook on the CDR-03C camera on the third brake light cavity.

8. Reinstall the third brake light assembly and make the video and power connections at the RVC interface or aftermarket radio.

**Red wire A is an extension of Red wire B. Use one that suits the installation and insulate the one that is not being used.*
