#### PRECAUTIONS:

- Remove the negative side of the battery to avoid any short circuits during the installation.
- Do not install the interface near any major components or near the HVAC system. This may cause damage or overheating to the vehicle.
- Do not disconnect the airbag connection behind the radio panel.

#### PRELIMINARY:

Please read the entire manual before installing this interface. This interface does not activate DVD reader.

#### SAFETY WARNING:

THIS INTERFACE IS DESIGNED TO ACTIVATE VIDEO IN-MOTION TO ALLOW THE PASSENGER ACCESS TO THE ADDRESS INPUT WHILE THE VEHICLE IS IN-MOTION. THIS INTERFACE MAY CAUSE AN ERROR WHEN SERVICED AT THE OEM DEALER. BE AWARE THAT MOST DEALERS WILL ATTEMPT TO VOID THE MANUFACTURERS WARRANTY WHEN INSTALLING ANY AFTERMARKET EQUIPMENT. IMPROPER USE OF THIS INTERFACE BY THE DRIVER MAY RESULT IN CITATION. DRIVER MUST KEEP FULL ATTENTION ON THE ROAD AND RESPONSIBILITY ON THE SAFETY OF THEIR PASSENGERS.

#### INSTALLING THE INTERFACE:

1. Remove the factory display to gain access to the factory connectors.
2. Remove the 54-Pin connector from behind the display.
3. Make the T-Harness connections behind the factory display. (if the connectors do not match please contact tech support)
4. Connect both Interfaces to an 8-Pin connector. No orientation.
4. Set the dip switches as needed on both interfaces. (See below)
5. Test the Navigation address input while the car is in-motion to verify the VIM is active.

As an option we have provided a 12v output wire from our interface, as the vehicle does not provide a 12v source. Not all vehicles support this feature.

#### SETTING THE DIP SWITCHES

- Dip 1: Activates the Video In-Motion feature. The dip switch is the permanent solution for keeping the VIM unlocked. The SWC/ Toggle Switch feature will be deactivated with it ON.
- Dip 2: If the vehicle has a factory Rear-View Camera, the installer must set DIP 2 to the "ON" position on the C-125 module only.
- Dip 3 & 4: Not used
- Dip 5: Place to the OFF position on both interfaces.
- Dip 6: Place to the ON position on both interfaces.
