- Adjustable UP-DOWN camera lens angle.

Vehicle Applications

TOYOTA
2012 – 2013 Tundra

Installation Diagram

INSTALLING THE CAMERA AND CABLE

1. Remove the tailgate cover.
2. On the right side of the tailgate handle, drill a hole using the hole saw provided.
3. Route the camera cable through the hole and secure the camera to the handle.
4. Connect the 4-Pin plug to the provided factory plug underneath the truck (near the spare tire) as the cable is pre-ran for the camera from the factory.
5. Put the gear in reverse to test the camera.
6. Re-install the tailgate cover.

4-Pin Connector near the spare tire
