

PRODUCT FEATURES:

- 180 degree viewing angle
- 720p AHD chipset for a clearer image
- Low light sensitivity
- With optional parking guide lines
- Includes a license plate and butterfly mount for mounting flexibility

PARTS INCLUDED:

CLP-180 CAMERA

EXTENSION CABLE

Butterfly Mount

INSTALLATION DIAGRAM:

***NOTE:** The camera needs a +12V trigger. Power the camera at the headunit using RED Wire B or from the reverse light wire using RED Wire A. **DO NOT** connect both wires to +12V at the same time. Insulate the red wire that is not being used. Tap the Black wire to an existing ground lead, or ground Black wire securely to vehicle body metal.

LICENSE PLATE CAMERA INSTALLATION:

1. Remove the license plate.

2. The license plate bar is mounted behind the license plate.

3. Adjust the angle if necessary.
