- Allows for Navigation Destination Address Entry at anytime*
- Designed for OEM equipment only

*Subject to capability of Factory-installed Navigation System.

PARTS INCLUDED:

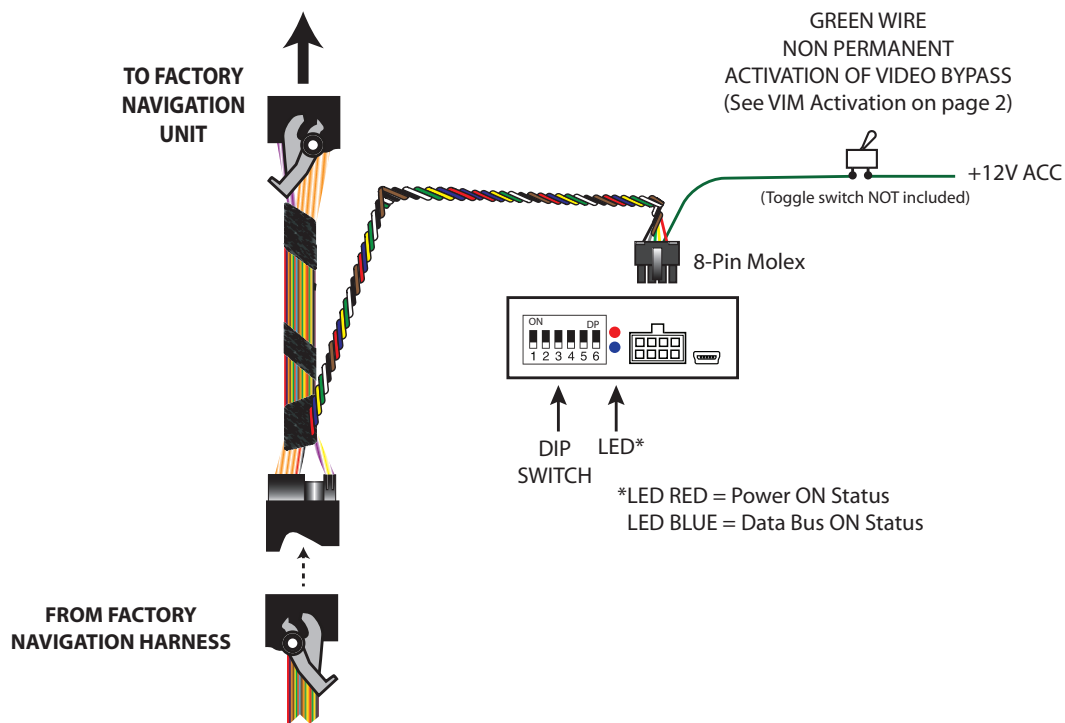

VIMVL-98B MODULE

VIMVL-98B HARNESS

INSTALLATION DIAGRAM:

Installation of the VIMVL-98B is done at the factory navigation unit Quadlock connector.

DIP SWITCH SETTINGS:

DIP#	DIP#1	DIP#2	DIP#3	DIP#4	DIP#5	DIP#6
Vehicles WITHOUT extra equipment (lane pilot, distance assistant, city safety system), V40 (model year 2013)	ON	OFF	OFF	OFF	ON	ON
Vehicles WITH extra equipment (lane pilot, distance assistant, city safety system)	OFF	OFF	OFF	OFF	ON	ON

VIM ACTIVATION:

Lane pilot, distance assistant and city safety system will not work while VIM function is activated!

The video-in-motion function can be activated or deactivated by setting DIP# 1 or alternatively by using the GREEN wire on the VIMVL-89B harness in conjunction with a toggle switch (not included).

Video-in-Motion Permanent

Set DIP#1 set to **ON** to activate the video-in-motion function permanently without disturbing the navigation performance.

Video-in-Motion Selective

With DIP#1 set to **OFF**, use the GREEN wire on the VIMVL-98B harness in conjunction with a toggle switch (not included) to activate the video-in-motion function.

Connect a toggle switch between the GREEN wire and +12V ACC power:

- +12V = VIM is activated
- 0V = VIM is not deactivated

VEHICLE APPLICATIONS:

Compatible with Sensus 2014 Navigation System

VOLVO

2014-Up	S Series
2014-Up	V Series
2014-Up	XC60
2014-Up	XC70
