2015-2015	GLA		

Notes

- The AVIMB-1 will enable the Auxiliary Audio/Video Input on the navigation radio menu.

Parts Included

Installation Instructions

1. Locate OBD-port and remove cover (commonly located under the dashboard on the driver side).
2. Turn ignition switch to ACC.
3. Wait until the navigation has booted.
4. Plug coder into OBD-port.
5. The navigation will re-boot.
6. When the navigation startup-screen shows, remove coder from OBD-port.
7. Your radio's Auxiliary Audio / Video input feature is now enabled.
8. Plug the aqua blue FAKRA connector to the back of the display's green FAKRA socket.
9. Use a video RCA extension cable (not included) and plug it between the FAKRA to RCA video adaptor cable and the video source (i.e. DVD Player)
10. Plug the black audio connector harness behind the radio and plug in the audio source.

To remove the Auxiliary Audio/Video feature from the navigation's menu repeat steps 1-6. After the first use on a vehicle, the coder AVIMB-1 is personalized to this vehicle. On this vehicle the enabling and removing the audio/video feature can be repeated without limit.

Operation

1. Activating the Auxiliary Audio/Video Input feature on the radio will create an A/V AUX tab on the source drop down menu.
2. Plug in your external A/V source, ie. DVD player to the A/V input cable.
3. Using the Comand controller on the center console, go to the source menu and click on the A/V AUX tab.
4. Video will appear on the display and audio should be heard on the factory sound system.
