INSTALLATION DIAGRAM:

SELECTING THE AUDIO SYSTEM:

If the vehicle is equipped with an amplified audio system, the SOCGM-17C has a built-in audio level adaptor that outputs the proper audio level from the aftermarket radio to the factory amplifier. To use this feature, plug in the male 8-pin connector on the SOCGM-17C harness to the GRAY female 8-pin connector on the SOCGM-17C module. The module is also labeled “Bose” and “Non Bose” to avoid confusion. (see picture below)

If the vehicle is NOT equipped with a factory amplified system, plug in the male 8-pin connector to the BLACK female 8-pin on the SOCGM-17C module.

CHIME VOLUME ADJUSTMENT:

The SOCGM-17C has a potentiometer to adjust the chime volume. It is set at half way by default. To adjust the volume, simply use a suitable screw driver and turn the potentiometer clockwise to increase the volume and counter-clockwise to decrease the volume.
