Right Front (-)	Gray
Left Front (+)	Gray/Black
Left Front (-)	White
Right Rear (+)	White/Black
Right Rear (-)	Violet
Left Rear (+)	Violet/Black
Left Rear (-)	Green
Parking Break	Green/Black
	Yellow/Black

SELECTING THE AUDIO SYSTEM:

If the vehicle is equipped with an amplified audio system, the SOCGM-18 has a built-in audio level adaptor that outputs the proper audio level from the aftermarket radio to the factory amplifier. To use this feature, plug in the male 8-pin connector on the SOCGM-18 harness to the GRAY female 8-pin connector on the SOCGM-18 module. The module is also labeled "Bose" and "Non Bose" to avoid confusion. (see picture below)

If the vehicle is NOT equipped with a factory amplified system, plug in the male 8-pin connector to the BLACK female 8-pin on the SOCGM-18 module.

CHIME VOLUME ADJUSTMENT:

The SOCGM-18 has a potentiometer to adjust the chime volume. It is set at half way by default. To adjust the volume, simply use a suitable screw driver and turn the potentiometer clockwise to increase the volume and counter-clockwise to decrease the volume.
